Beef and poultry consumption in Indonesia is still lower than beef and poultry consumption in Malaysia (2024)

FY 2024 - Consumption (kg/capita)

Source: OECD-FAO

- Indonesia's selected food market consumptions are projected to increase during the 2024-2029E period in line with the growth of GDP per capita, which represent the increase in confidence among consumers and business.
- Demand for beef and poultry in Indonesia shows positive trajectory, given domination of productive age population, growing middle-income class and substantial role of beef and poultry as main animal protein sources in Indonesia (the world's most populous Muslim-majority country).
- Low consumption of beef and poultry per capita in Indonesia in 2024 is still low compared to other selected Southeast Asia Countries, indicates ample room for growth mainly supported by progressing income per capita in Indonesia.
- Household consumption of beef and poultry per capita in Indonesia for 2029F are 1,67 kg/capita and 8,29 kg/capita (OECD-FAO).
- The total per capita all segments consumption of beef and poultry in Indonesia for 2029F are 2,89 kg/capita and 20,19 kg/capita (Susenas-BPS).

SERTIFIKASI

10 October 2022

Dr Ir. Nasrullah
Director General
Directorate General of Livestock and Animal Health Services
Ministry of Agriculture
6th Floor, C Building
Harsono RM Street No. 3
Pasar Minggu Jakarta 12550
Indonesia

Dear Dr Nasrullah

OUTCOME OF VISIT TO INDONESIA FOR ACCREDITATION OF THREE CHICKEN SLAUGHTERHOUSES

The Singapore Food Agency (SFA) would like to warmly thank DGLAHS for the arrangements made for the accreditation trip to Indonesia from 12-16 Sep 2022. The objective of the trip was to evaluate the following establishments for the export of chicken to Singapore:

| S/N | Establishment Name | NKV no. | Products applied for export to Singapore | Applicant type |
|-----|---|------------------|--|-----------------------------------|
| 1 | PT Widodo Makmur Perkasa | RPHU-331202-274 | Frozen chicken | Slaughterhouse |
| 2 | PT Charoen Pokphand Indonesia - Bandung | RPHU-3204100-003 | Frozen chicken | Slaughterhouse with cutting plant |
| 3 | PT Raja Jeva Nisi - Bogor | RPHU-3201250-005 | Frozen chicken | Slaughterhouse with cutting plant |

2 In general, there are food safety and hygiene programmes in place at the establishments. However, there are several non-compliances related to Good Manufacturing Practices (GMP), CCP and record keeping, which must be satisfactorily rectified before approval of the slaughterhouses can be considered. The list of corrective actions required are detailed in [Annex A - C](#). Recommendations are also included for the slaughterhouses' consideration.

3 In addition, we note that some poultry farms supplying to the slaughterhouses are in the midst of obtaining their Avian Influenza (AI) free compartment certification. With reference to SFA's letter dated 30 Jun 22, poultry slaughterhouses interested to

www.sfa.gov.sg

export to Singapore are required to source exclusively from broiler farms certified as AI-free compartments by DGLAHS. These broiler farms are only to source their replacement stock (i.e. day-old-chicks) from breeder farms (i.e. Parental and Grand Parental (PS and GPS) farms) which are AI-free compartments. As such, approval can only be considered after the necessary certifications have been obtained.

4 We would be grateful for submission of the corrective actions and updates to the AI-free compartment certification from the slaughterhouses by **31 Dec 22**.

5 In addition, with reference to our letter dated 26 Jul 22 regarding SFA's approach to Pathogen Reduction Treatments (PRT) on raw meat, we note that PRTs have been observed to be in use in the slaughterhouses inspected. Hence, we would require a new attestation below in the health certificate for export of poultry meat and its products from Singapore to Indonesia:

"Pathogen reduction treatments (PRTs) have only been used on raw meat that has not been salted, marinated, preserved, or undergone any other form of processing. The establishment has used only SFA-approved PRTs up to their maximum use levels. PRTs have been used in addition to proper hygiene practices and were not used to make contaminated meat fit for human consumption."

6 We would like to thank DGLAHS for the continued and close cooperation between our agencies and look forward an updated draft export health certificate for our mutual agreement.

Yours sincerely

Ms Jenny Loi
Deputy Director
Risk Management & Surveillance Department
Joint Operations Division
